Date: Sep. 1, 2020

To: **All Dealers,**

Sakai America is excited to offer training for salespeople, technicians and compaction experts at our factory in beautiful North Georgia. Our 100,000 square foot facility provides the perfect setting for training dealer personnel in all aspects of compaction, maintenance and repair of all models Sakai offers.

The many advantages of hosting training at our factory include: component access prior to, during and after assembly, controlled environment for walk around and technician training, cranes and tooling on site, large meeting space for in class training, hands-on access to all eleven North American models of heavy equipment and ten models of light equipment, compaction expert training available, demo site for gradeability and operation training and the list goes on and on.

The sales and technician training can occur simultaneously and would be a 2-day course. The addition of compaction expert training would require an additional 2 days. We offer almost any mixture of training and can accommodate up to 10 people at a time. Breakfast snacks and a hot lunch will be provided each day.

We will make our facility available for this training during the first halves of November and December, the second half of January and anytime during February and March. Please contact Kendall Phillips, Kendall.phillips@sakaiamerica.com or Gerry Petty, gerry.petty@sakaiamerica.com to schedule training.
